Will not some kind friend tell us which of the Constitutions it is that we are about to annihilate?

This wide divergence of creed of the Copperheads of the East, when compared with that of the Malignants of the West, can have only this rational explanations. In each section they are as deloyal as they darp be—they go to the extreme limit of popular endurance, and wait only the they darp beet they go to the extreme limit of popular endurance, and wait only the opportunity to easily proclaim their doctrine as it is find the constitution as it is find the constitution of Mr. Lincoln, for any Constitution rather than that which has pains and penalties for the traitors who are in arms arained the Constitution that the founders are constitution to the constitution that the founders are constitution to the constitution that the founders are const

AN OFFICIAL ANSWERRED.

The Copperhead prints of New York have raised quite an outcry in respect to the apportforment of the draft—alleging that the proportion of drafted men from Democratic districts is much greater than from Republican districts. Gov. Seymour become so full of the same notion that he sent his Judge Advocate to Washington to demand an explanation and a correction. He got the former but not the latter. The Secretary of War informed him that the He got the former but not the latter. The Secretary of War informed him that the Government has not apportioned any number to the different districts but simply called for a draft of one-fitte of the carried pers up in the State; that the difference in the ambier of drafted men called for in each district, arises solely from the difference in the enrollment, as one-fitte from each district is called for, neither the carried passes and the manner in which it was brought about, for he says:

In regard to taking possession of its office. from each district is called for, neither more nor less. And that if more men are carrolled in the Democratic than in the Republican districts, it is simply because the persons representing the apparent deficit in the latter have already volunteered and are with the army. This explains the rastier satisfactorily. In the Republican districts the bulk of the young men between 20 and 25 years of age, have circady game to the augu, and of course cannot be carrolled for the draft.

While in the Democratic strongholds, par-

tion be made, the reason will be that the publican wards have sent to the army a larger number of men than the Demo-Volunteered from the control of fourths of the number were staunch bligans. The draft in Chleago, as here, will be called for a per cent of a names annolled.

North Side Beligious Enterprises.

For some weeks past, as many of our city readers are aware, efforts have been put forth to erect a new and permanent Mission Sabbath School and Bethel structure on the north side of the river, for the accommodation of the North Market Mission Sabbath School, and connected therewith a Free Church, designed to reach the sallors, and to be called a Bethel Church.
